Introduction
This guide provides an overview of the TrendTrack project, a web application for fabric sales, as well as the group project we did for Copaco. It explains the contents of the project ZIP file, helping you navigate through it more effectively.

Project Breakdown

- **trendtrack_front:** The frontend implementation of the application.
- **trendtrack_back:** The backend implementation, including CI/CD pipeline and Docker file.
- **Documentation Folder:** Includes documents such as the Design Document, Project Plan, UX Feedback Report, Security Report and Web Performance Review Document.
- **Feedpulse.pdf:** Contains all FeedPulse checkpoints received during the semester.
- **GroupProject.zip:** The complete frontend and backend from the group project.
- **TeamsEvaluationFinal.pdf:** The scrum master's evaluation document, detailing each member's responsibilities for the group project.
- **README.md:** Contains essential information regarding the project.
